He advocated that learners must form a living contact with the community in whose midst their institution is located, he suggested that instead of undertaking academic research about economic and social disability, the students should do “something positive so that the life of the villagers might be raised to a higher material and moral level”. For him, it is a symbiotic relationship between the learning of a student and the service to the community/Nation.

Albert Einstein stated, *“Education is that which remains when one has forgotten everything he learned in school”*. The quote encapsulates the vision which education system should be practicing rather than rote learning with entire focus on completing the syllabus and assessing through examination system within the educational institutions. The purpose of “Education” is to develop core competencies with an optimum amalgamation of the knowledge, skills, abilities, and behaviors that contribute to individual and organizational performance. Knowledge is information developed or learned through experience, study or investigation. Skill is the result of repeatedly applying knowledge or ability.

In addition, the knowledge received by the college students; in order to develop their personality through physical labour, service, character and renouncement and to give them an experience of practical life, this programme has distinct role in college and social field. The realization that my knowledge, my labour, my energy is not for me alone but it is important for you and the entire society, the feeling of **“NOT ME BUT YOU”** is developed and instead of craving for money, power and selfish motives the young generation is to give lessons of renouncement and service by this programme and hence it is important NSS has a special plan which enables the student to receive information of all components of the society and creates awareness towards his social obligations. The true picture of poverty and leadership of the community/village life can be seen and experienced by the youth who participate in this activity. This makes their personality more caring, creative and progressive.

NSS is an activity through which the college makes a welcome effort to reach the society through extension & outreach component. We believe that the educational institution should not restrict its work to education and research only but should also make continual efforts for the progress of the common masses. With this thought the Ministry of Youth Affairs & Sports is implementing numerous activities and NSS is one such important activity.

NSS is not an extra-curricular activity in the true sense. It is an activity to study people and life through active participation in addition it is helpful in the vivid and clear study of various fields of sciences. It is organised with this view in mind, the college education will

receive a new dimension and through the communications and dialogue between the educational institutions and the common man, social transformation would be boosted.
